

Art:

Create a work of art with litter

**WILD
PLANET
TRUST**

Use litter to create art to educate and stimulate discussion (as with our Let's Turn the Tide display, by artist Jackie Kidd)

- ◆ This does not have to be litter collected from a beach – you can use wrappers etc. from your meals at home
- ◆ Single or multiple items could be used, or the items could be modified – for example, painting a healthy ocean scene on a plastic bottle top, or a shoal of fish each folded from a crisp packet

Please ensure that materials used are recycled at the end of the project, if possible, to minimise impact.

Something to think about...

The Problem with Plastics for Penguins

Learning Intention

We are investigating and discussing an environmental problem.

Can you answer the following questions?

1. How can plastic hurt an animal?
2. How can plastic get into the sea?
3. How can plastic move around the ocean?
4. What are nurdles?
